**OAK RIDGE CEMETERY**

For the mutual protection of every lot purchaser in the cemetery, Oak Ridge Cemetery hereby adopts the following rules and regulations. All property owners of interment rights and persons within the cemetery, and all interment rights sold, shall be subject to said rules and regulations, and subject, further, to such other rules and regulations, amendments or alterations as shall be adopted by Oak Ridge Cemetery from time to time. Any reference to these rules and regulations in the contract, deed, or certificate of ownership to interment rights shall have the same force and effect as if set forth in full therein.

These rules and regulations are designed for the protection of Oak Ridge Cemetery and the collective owners of burial rights. They are intended, not as restraining, but rather as preventing the inconsiderate from taking unfair advantage of others. Their enforcement will help protect and preserve the beauty of Oak Ridge Cemetery.

These rules and regulations are hereby adopted as the rules and regulations of Oak Ridge Cemetery and all owners of burial rights, visitors, and contractors performing work within the cemetery, shall be subject to said rules and regulations. The cemetery expressly reserves the right, at any time and without notice, to adopt new rules and regulations or to amend, modify, or repeal any section, paragraph, or sentence of these Rules and Regulations. Oak Ridge Cemetery has entire charge of the cemetery and is authorized to enforce all rules and regulations as adopted.

The rules and regulations shall be on file in the cemetery office, and copies shall be made available to interested parties on written request, and payment of administrative fees associated therewith. The cemetery reserves the right to provide these rules and regulations within ten days of written notice.

- Lower outer burial container into the gravesite.

## **CASKET CONTAINER STANDARDS**

Remains for interment shall be delivered to the cemetery in a casket or container composed of rigid material such as wood, fiberglass, plastic or metal and shall be of such construction so as to, (1) assure protection to the health and safety of the cemetery personnel, (2) provide proper covering for the remains and (3) meet moral codes for the respect and dignity of the deceased. A full enclosure “dome” or top piece so constructed that in its closed position it completely shields the remains from view at all times, with a rigid bottom, substantial enough not to deflect under the weight of an adult human body shall be required. The management reserves the right to make exceptions for special conditions, oversized or overweight deceased persons, children, limbs, or pathological tissues and other reasons determined by the management.

All babies or stillborn births, whether interred in Babyland or on any other interment right in the cemetery shall be in a retrievable container. Receptacles of biodegradable materials shall not be permitted.

All remains entombed in mausoleums shall be in a casket or alternative container conforming to the standards as prescribed by the cemetery. The management may, at its discretion, require that mausoleum entombments be in a casket or alternative container, or other container approved by the cemetery, which is constructed and designed to be resistant to the leakage of fluids and odors.

## **CASKET DIMENSIONS - MAXIMUM**

Maximum casket dimensions for Chapel Mausoleum crypts shall be 25” high, 31 ½” wide, and 87” in length.

Maximum casket dimensions for Abbey crypts are 22 ¼” high, 29 ½” wide, and 87” in length.

## **CASKET NOT TO BE OPENED OR BODY TOUCHED WITHOUT CONSENT**

Once the committal service is completed and the casket is ready to be placed, no person shall open the casket or touch the body without the consent of the legal representative of

the deceased or an order of a court of competent jurisdiction; provided the management may take appropriate steps to correct any obnoxious or improper condition.

## **CHANGE OF ADDRESS**

It shall be the duty of the lot owner to notify the management of any change in post office address. Notice sent to a lot owner at the last address on file in the office of the cemetery shall be considered sufficient and proper legal notification.

## **CONTAINER INSTALLATION**

No outside container shall be installed without the explicit authorization from the management. In every case the charges therefore shall be paid in advance or arrangements satisfactory to the management made concerning payment, including but not limited to, any other outstanding charges on that particular space, and in some instance on the entire lot in question.

Any funeral director (licensee) approved by the management or the agent, servant, or employee of the funeral director may be authorized by the management to enter on any section, lot, or space for the purpose of installation of outside containers. To insure compliance with these Rules and Regulations, the funeral director shall obtain explicit authorization from the management for such purpose.

In addition, the licensee shall provide proof of general liability, worker's compensation and products liability insurance satisfactory to the management. Said insurance certification shall provide that the insurance carrier must give at least thirty (30) days written notice to the management in the event the insurance is canceled by the licensee.

Outside containers shall be installed at such times as the management may permit, dependent upon committal service and the maintenance activities of the cemetery.

The licensee shall provide appropriate guarantees and hold harmless agreements to the management to insure that the cemetery grounds are not injured by the installation and to insure that the container was not damaged in installation. Upon completion, the management shall inspect the work done, and shall, if necessary, do whatever is necessary to restore the cemetery premises to their condition prior to installation, and shall charge back against said licensee the costs of restoration. Any balance owed by said licensee shall be remitted within thirty (30) days of receipt of the itemized statement, or the management shall prohibit the vault company access to the cemetery until such time as the balance is paid in full. The management shall hold the licensee responsible for any and all legal fees incurred by management in the process of trying to collect all due the cemetery.

Outside container installation requires experience and special equipment. No person, firm, or corporation, other than recognized and approved licensees or the management shall be permitted to install outside containers in the cemetery.

Any licensee who refuses or fails to comply with these Rules and Regulations shall not be given the privilege to enter on the cemetery grounds for installation purposes until compliance is effected.

## **CONTAINER - OUTSIDE**

All burials must be made in a two (2) piece concrete box or vault that is not hinged of type, quality, and construction approved by the management. The use of wooden boxes and sectional boxes shall not be permitted. All boxes and vaults sold by anyone other than the management shall be placed and serviced with the direction of the management or a licensee, which installation shall be supervised by management. However, the management assumes no liability in the placement or handling of such boxes or vaults.

All cremated remains of human bodies shall be buried in a permanent, retrievable container. Inurnment or entombment shall be in a container approved by the management. Short term storage may be permitted as provided in these Rules and Regulations.

Construction shall be such that the container shall resist cracking, puncturing or structural failure as determined by management, which decision shall be conclusive on all third party sellers and installers.

Without limiting the generality of the above, the standards below shall apply to all outside containers:

### **A. STRUCTURAL DESIGN AND STRENGTH**

1. The container must test favorably at a strength level sufficient to withstand a static uniform load of 4,000 pounds per square foot, applied to the top surface. Such load may not produce a deflection of more than ½” on the top surface, nor more than 3/8” on the side walls.
2. There are no specific standards on weight; however design shall incorporate the necessary structural strength at the minimum achievable weight, and the container shall be reasonably imperious to puncturing by the backhoe or other equipment, and shall be of such weight as to avoid buoyancy in the grave space due to water-filled voids.
3. Design contours require that the maximum perimeter dimension be at the bottom of the container so as to preclude any problems of voids in the back filling of the grave.

## **B. DIMENSIONS**

1. Outside dimensions should not exceed 94 ½” in length and 34 ½” in width for 36” graves and 38 ½” in width for 40” graves for the regular manufacturing standard. Height should provide a 26” inside clearance but limited to the least possible exterior height to achieve this. Unnecessarily high containers require excavation to a greater depth and the potential of increasing the costs of interment to the user.
2. Outer container wall thickness shall be the minimum possible, consonant with the strength requirements previously stated. The outer dimensions of the container are limited to the dimensions stated above, and the inner dimensions shall be sufficient to permit use of practically all caskets.
3. Special sizes are necessary from time to time, either to accommodate a very narrow excavation, or to accommodate a singularly oversized burial. In these cases all other standards but dimensions shall apply.

## **C. MATERIAL**

1. Material used in the construction of a burial container must be impervious to the destructive action of the natural elements contained in the soil which can range from extreme acidic to extreme alkaline conditions. Accelerated tests, designed to simulate fifty years of earthen burial are acceptable in determining the capacity of various materials to withstand solid conditions. The tests must be conducted by a recognized independent testing laboratory, with a copy of the test results provided to management.
2. Approved outer containers of reinforced concrete do not require time acceleration tests since long and extensive experience have provided direct operational data. New concrete containers submitted for approval must simply meet the following standards drawn from this experience.
3. Portland Cement Concrete used in outer containers must meet American Concrete Institute standards for reinforced concrete and shall also meet such standards for concrete curing.
4. Plastic or fiberglass materials are not approved unless such materials meet the static load standard and withstand puncturing or damage from a backhoe or other equipment used in the interment process, and such materials are of such density to prevent movement within the grave space due to buoyancy from water-filled voids. Any such containers shall be tested by the cemetery, and approved by the management, in writing, as a condition precedent to use.

## **DISINTERMENT**

No disinterment or removal shall be made except by the management on request of the person(s) with legal authority to direct the same, or by court order prior to time of removal. At least seventy-two hours notice shall be given prior to any removal. The removal will be made at the convenience of the management, with consideration to inclement weather, weather predictions, and interment schedules. The management may defer an interment or disinterment until a more appropriate time for any reason. All fees associated with any disinterment shall be paid in full prior to the service being provided.

The cemetery shall exercise due care in making disinterments, but shall assume no liability for damage to any body, casket, outer burial receptacle, or urn in making a disinterment. When a disinterment is to be made from one grave to another grave and an outer burial container was not used for the original interment, an outer burial container meeting the cemetery's specifications must be furnished by the owner or next of kin for the new interment.

The cemetery may require that all persons attending an interment or disinterment remain at safe distance, as determined by the management, from the interment space during the interment or disinterment.

The responsibility of Oak Ridge Cemetery for any disinterment of an outer burial container (Vault), containing remains shall be limited to excavating down to the vault to allow a contracted burial vault company to access the vault for removal. It shall be the burial vault company's responsibility to secure their removal device to the vault, as well as responsible for removing the vault from the excavation and relocating it to a site contracted by the party authorizing the disinterment. The disinterment fee charged by Oak Ridge Cemetery only provides for excavation as listed above. All other fees, including, re-interment, burial vault company fees, Funeral Director fees and any other fees/costs associated with the disinterment shall be the responsibility of the party authorizing the disinterment or their agent. (12/21/2021)

Oak Ridge Cemetery responsibility for disinterment of remains not contained within burial vaults, or caskets will be limited to excavating to the remains, which will become the responsibility of a licensed funeral director for removal, as well as for which the Oak Ridge prevailing disinterment fee will be assessed. Any additional services/fees will be paid by authorizing party or their agent.

Disinterments require a disinterment permit, a licensed Funeral Director to oversee the disinterment, and a burial vault company to remove and relocate the vault. All associated costs with these requirements are separate from the Oak Ridge Cemetery disinterment fee and are assessed to the authorizing party or their agent.

## **EMBALMING**

Because of health reasons and the possibility of obnoxious odor, no entombments shall be made in any above ground crypt unless the remains of the deceased to be entombed therein have been embalmed; provided, however, that the cemetery may, in its discretion, decide to allow entombments of unembalmed human remains if the casket containing such remains is placed in an outside container acceptable to the cemetery, which container is constructed and designed to resist the leakage of body odors and fluids.

Management shall not be liable for the cost of said container or for embalming the body. Whether the body is embalmed, or allowed by the management not to be embalmed, the cemetery shall assume no financial responsibility for correcting any fluid leakage or obnoxious odor that might occur. The management shall, and reserves the right unto itself, charge the responsible parties for the cost of rectifying the leakage or odor.

## **ERRORS MAY BE CORRECTED**

The management reserves, and shall have, the right to correct any errors that may be made by it either in making burials or removals, or in the description, either by canceling such conveyance and substituting and conveying in lieu thereof other interment property, of equal value and similar location as far as possible, or as may be selected by the management, or by refunding the amount of money paid on account of said purchase. In the event the error shall involve the burial of the remains of any person in such property, the management reserves, and shall have, the right to remove and bury the remains in such other property of equal value and similar location as may be substituted and conveyed in lieu thereof. The management shall also have the right to correct any errors made by placing an improper inscription, including an incorrect name and/or date, either on the memorial or on the container for cremated remains. The cemetery shall have no liability as a result of any errors of the type described herewith other than its obligation to take the remedial actions described.

When any holiday falls, or is observed, on a Saturday or Monday, arrangements for an interment must be provided by the last weekday preceding the holiday.

## **IDENTITY**

The management assumes no duty for identity of the remains of the deceased, and can give no assurance that the remains interred are that of the person shown on the interment authorization executed and delivered to the management. The management relies upon the representation of family, funeral director, or others making such statements of identity for interment authorization, burial permits, or death certificates, and shall have no obligation to independently establish or verify the identity of the remains.

## **INDEBTEDNESS – PAST DUE**

Arrangements for the payment of any and all indebtedness due the management must be made before interment shall be made. No merchandise or other services shall be provided or any merchandise installed until all charges due the management are paid.

## **INTERMENTS – DELAYS IN**

The management shall be in no way liable for any delay in the burial of a body where a protest to the burial has been made, or where the Rules and Regulations have not been complied with, or because of strikes, the elements, an act of God, common enemy, thieves, vandals, malicious mischief makers, explosions, unavoidable accidents, invasions, insurrections, riots, or order of any military or civil authority. The management further reserves the right, under such circumstances, to place the body in the receiving vault until the full rights have been determined, and the protest or noncompliance has been resolved. The management further reserves the right to impose reasonable fees for such temporary holding. Any protest must be in writing and filed in the office of the cemetery. All bodies placed in receiving vaults shall be embalmed.

## **INTERMENT OF PETS**

No pets shall be interred in the cemetery, either alone or with human remains.

## **INTERMENT – RIGHT OF DESCENT**

removed, upon the death of the owner, unless he has disposed of the lot either in his will by a specific devise or by a written declaration filed and recorded in the office of the cemetery authority, the interment rights descend to the heirs at law of the owner subject to the rights of interment of the decedent and his surviving spouse provided for in these Rules and Regulations.

### **INTERMENT SPACE – LOCATION**

When instructions from the lot owner regarding the location of an interment space in a lot cannot be obtained, or are indefinite, or when for any reason the interment space cannot be opened where specified, the management may, in its discretion, open it in such location in the plot as it deems best and proper, so as not to delay the funeral; and the management shall not be liable in damages for any error so made.

### **INURNMENT - CONTAINER SPECIFICATIONS**

All cremated remains to be inurned in the cemetery shall be placed in a sealed, retrievable container of a type, quality and construction approved by the management. The use of paper, cardboard, or other similar biodegradable materials shall not be permitted.

(9/1/2024)

### **INURNMENT - LAWN CRYPT**

If the intended use for the lawn crypt is not used for the entombment of human remains, and the disposition changes to an inurnment of cremains, no refund is allowed. The cremated remains will not be placed inside the lawn crypt. The cemetery will perform an inurnment of the cremains on top of the lawn crypt. The urn/urn vault must be a retrievable container that is not fragile and will not decompose. The maximum size of the inurnment container is 14 x 10 x 11. (4/18/2023)

### **LAWS**

In addition to being subject to these Rules and Regulations, all burials and removals are made subject to the orders and laws of the properly constituted authorities of the city, county and state.

Consent from responsible parties at the time of death shall be obtained. When a single grave has been donated by the cemetery, the grave space reverts back to the cemetery.

## **LOT SALE POLICY**

All Interment rights on pinned or platted lots within Oak Ridge Cemetery are considered “For Sale” unless determined by Oak Ridge Cemetery to be unusable due to physical barriers such as trees, roots, infrastructure, utilities, etc. No useable lots or blocks may be held, reserved or restricted for the convenience of any family or individual, unless that family or individual owns the interment rights for said lot(s) or block. Oak Ridge Cemetery may at its’ discretion allow a maximum of a 30 day “courtesy hold” without a deposit, on a lot(s) for a family needing time to make a purchase decision.

Due to normal cemetery maintenance operations and the ability to move equipment throughout the cemetery, any grave space that has been approved and sold in a path will only be allowed to place a flush marker on this space. The design and size of the marker must comply with cemetery policy for flush marker areas. (11/19/2024)

Only the right to inter is conveyed. Oak Ridge Cemetery retains all other interest in the space, crypt, or niche conveyed. All interment rights conveyed to individuals are the sole and separate property of the owner named in the instrument of conveyance.

Successors in interest shall be determined as follows: The spouse of an owner of any lot containing more than one interment space has a vested right of interment of his/her remains in the lot and any person thereafter becoming the spouse of the owner has a vested right of interment of his/her remains in the lot if more than one interment space is unoccupied at the time the person becomes the spouse of the owner.

No conveyance or other action of the owner without the written consent of joinder of the spouse of the owner divests the spouse of a vested right of interment, except that a final decree of divorce between them terminates the vested right of interment unless otherwise provided in the decree.

In a conveyance to two or more persons as joint tenants, each joint tenant has a vested right of interment in the lot conveyed. Upon the death of a joint tenant, the title to the lot held in joint tenancy immediately vests in the survivors, subject to the vested right of interment of the remains of the deceased joint tenant.

A vested right of interment may be waived and is terminated upon the interment elsewhere of the remains of the person in whom vested.

An affidavit by a person having knowledge of the facts setting forth the fact of the death of the owner and the name of the person or persons entitled to the use of the lot is complete authorization to the cemetery to permit the use of the unoccupied portions of the lot by the person entitled to the use of it.

An affidavit by any person having knowledge of the facts setting forth the fact of the death of one joint tenant and establishing the identity of the surviving joint tenants named in the deed to any lot, when filed with the cemetery, is complete authorization to the cemetery to permit the use of the unoccupied portion of the lot in accordance with the directions of the surviving joint tenants or their successors in interest.

When there are several owners of a lot, or of right of interment in it, they may designate one or more persons to represent the lot and file written notice of designation with the management. In the absence of such notice or of written objection to its so doing, the cemetery is not liable to any owner for interring or permitting an interment in the lot upon the request or direction of any co-owner of the lot.

No vested right of interment gives to any person the right to have his/her remains interred in any interment space in which the remains of any deceased person having a prior vested right of interment have been interred, without acquisition of a second/third right of interment.

## **TRANSFER OF BURIAL RIGHTS**

If an heir of the decedent(s) would like burial rights assigned to them, they must get permission from at least one more than half of the surviving heirs of the lot owner or the decedent(s). Oak Ridge Cemetery uses obituaries to determine lineage. (3/16/2021)

Services are scheduled to accommodate the family and the clergy in a time frame where both the funeral home and the cemetery can best serve the family. Services cannot be scheduled without the concurrence of all parties.

2. Management shall have authority to reject any plan or design for any memorial which, on account of size, design, inscription, kind or quality of stone is (in the opinion of the management) unsuited to the lot on which it is to be placed.
3. The management reserves the right to stop all work of any nature, whenever, in its opinion, property preparations therefore have not been made; or when tools and machinery are insufficient or defective; or when work is being executed in such a manner as to threaten life or property; or when the monument dealer has been guilty of misrepresentation; or when any reasonable request on the part of the management

2. The bottom beds of all bases and markers must be cut level and true, and the sides of all bases shall not be polished.

Any proposed memorial that management deems to be detrimental to the appearance, uniformity, or safety of the section will not be permitted; however, recommendations will be made as to necessary changes that would then conform to the regulations. Memorial restrictions for each section are shown on Appendix "A" attached to these Rules and Regulations, and no deviation therefrom will be authorized without the explicit approval of management of the cemetery.

Before any person, other than cemetery personnel, does any work on any marker or lot, authorization shall be obtained from the cemetery office. No memorial shall be installed without this authorization. In every case the charges due the cemetery shall be paid in advance or arrangements satisfactory to the management are made concerning payment, including, but not limited to, any other outstanding charges on that particular lot, space, crypt, or niche.

The management shall provide for the installation of all memorials unless other arrangements satisfactory to the management are made. The management shall charge for installation, which charges may be changed from time to time by the management.

Any recognized monument dealer may be approved by the management to enter on any section, lot, or space for the purpose of installation of memorials.

In addition, the monument dealer shall provide to the management of the cemetery proof of general liability, worker's compensation and products liability insurance satisfactory to the management. Said insurance certification shall provide that the insurance carrier must give

thirty (30) days written notice to the management in the event the insurance is canceled by the monument dealer.

Memorials shall be installed at such times as the management may permit, dependent upon committal services and the maintenance activities of the cemetery. No memorial installation shall take place on blocks where interments are scheduled for that day, until such time as the interments are completed.

Any monument dealer performing installations of memorials shall insure that the cemetery grounds are not injured by the installation, and that all excess materials, rubbish, and other waste is cleaned up and removed from the premises, and that the grass, or other ground cover is restored; and to insure that the memorial was not damaged in installation.

Upon inspection by the management of the cemetery, any damage to the grounds of the cemetery must be corrected and the grounds restored. In the event this is not done to satisfaction, the management shall do whatever necessary to restore the cemetery premises to their condition prior to installation, and shall charge back against the monument dealer the costs of correctional restoration. Any balances owed to the management of the cemetery by the monument dealer shall be remitted within thirty (30) days of receipt of the itemized statement, or the management shall prohibit the memorial dealer access to the cemetery until such time as the balance is paid in full.

Memorial installation requires experience and often times special equipment. No person, firm or corporation, other than recognized and approved monument dealers or management shall be permitted to install memorials in the cemetery.

Any monument dealer who refuses or fails to comply with these Rules and Regulations shall not be given the privilege to enter on the cemetery grounds for installation purposes until compliance is affected.

No final date can be engraved on a memorial marker unless the remains are actually interred at the gravesite lot. In the event a marker has been placed and an interment has not, or will not take place at that specific grave lot, and inscription stating "In Memory of" may be placed on the marker, so as to not falsely represent an interment within that lot. With an inscription of "In Memory of" both the birth date and final date may be inscribed. This inscription will allow cemetery staff to know that the remains are not at the grave site and no official record interment will be on file.

## **MISCELLANEOUS**

Should any memorial become unsightly, dilapidated, or a menace to visitors, the management shall have the right either to correct the condition or to remove the same, at the expense of the lot owner.

## **ENDOWMENT AND SPECIAL CARE**

### **ENDOWMENT CARE – DEPOSIT**

The purchase price of all interment rights sold and to be sold in the cemetery is subject to an additional charge to be deposited into the Endowment Care Fund, which amounts are held in trust and invested in accordance with the laws of the state of Illinois. Care and maintenance means that, within the limits permitted by the income derived from the Care Fund, the cemetery grounds will be maintained and preserved including cutting grass, and trimming of shrubs and trees at reasonable intervals; the caring for and maintaining of all foundations of memorials, monuments, markers, and benches; the procuring of, maintaining and keeping in good repair the drains, water lines, roads, buildings, fences and other structures, including features and embellishments of a general character applicable to the cemetery as a whole or as to a particular area; painting, cleaning or otherwise preserving same at reasonable intervals; maintaining the necessary records of interment space ownership and burials; and maintaining other necessary information, and having same available to the public authorities and other interested persons.

### **ENDOWMENT CARE EXCEPTIONS**

The term “endowment care” shall not be construed as meaning the maintenance, repair or replacement of any memorials placed or erected upon lots; nor the planting of flowers or ornamental plants; nor the maintenance or doing of any special or unusual work in the cemetery; nor does it mean the reconstruction of any marble, granite, bronze or concrete work on any section or lot, or any portion or portions thereof in the cemetery, mausoleum, or other building or structure, caused by the elements, an act of God, common enemy,

thieves, vandals, strikers, malicious mischief makers, explosions, unavoidable accidents, invasions, insurrections, riots, or by order of any military or civil authority, whether the damage be direct or collateral.

### **ENDOWMENT CARE – EXPENDITURE LIMITED TO INCOME**

Endowment care and special care, whether applied to lots, mausoleums, or to any space within the confines of the cemetery, shall be limited absolutely to the net income received from the investment of the care funds and no part of principal shall be expended.

### **ENDOWMENT CARE – FUNDS DEPOSITED WITH OTHERS OF LIKE CHARACTER**

It is understood and agreed between the lot owner and the cemetery that endowment care funds and special care funds may be deposited with others of like character and intent, to the end that the income from such accumulated funds shall be used for care as provided in the Rule and Regulations; but in no case shall their deposit be construed as a contract to care for any individual property or space in any way other than as defined in said Rules and Regulations; and the care of the grounds and buildings, and special care, shall be limited to the net income received from the investment of such funds.

### **ENDOWMENT CARE OF LOTS**

Endowment care is that care and maintenance necessitated by natural growth and ordinary wear which can be provided at reasonable intervals with income from the endowment care fund, and includes the planting, cutting, watering, and care of lawns, trees and shrubs; the cleaning and upkeep of buildings; and maintenance of utilities, walls, roadways, and walks. The management may also use a portion of the income from such fund for such general care, maintenance, repairs and embellishment as it, in its sound discretion, shall deem to be for the best interest of the cemetery to the end that the cemetery generally be kept in the best condition possible within the limits of such income.

### **ENDOWMENT CARE – LOTS AND SPACES NOT HAVING ENDOWED CARE**

All persons owning lots and grave spaces not having endowed care must make arrangements for placing the lots or graves in endowed care. No interments may be made nor memorials, monuments or markers placed on any spaces until such time as care is paid in full.

## **ENDOWMENT CARE AND SPECIAL CARE FUNDS – INVESTMENT OF**

The money received for endowment care and special care shall be held in trust and invested as provided by law. The management reserves the right, however, either to handle all investments itself, or to deposit said funds with any person, company or corporation qualified to act as trustee for such funds.

## **MANAGEMENT TO DIRECT EXPENDITURES**

The net income from the endowment care fund shall be expended in such manner as will be most advantageous to the property owners as a whole, and in accordance with the purposes and provisions of the law applicable to the expenditures of such funds. The management is hereby given the full power and authority to determine upon what property, for what purpose and in what manner the net income from said fund shall be expended and it shall expend the net income in such a manner as, in its sole judgment, it may deem advisable for the care, reconstruction, repair and maintenance of all or any portion of the cemetery grounds or mausoleums. It may also expend the income for attorneys' fees and other costs necessary to the preservation of the legal rights of the cemetery.

## **SPECIAL CARE – BY AGREEMENT ONLY**

“Special Care” shall include only those specific services set forth in a Special Care Agreement with the lot owner. It may include the improvement or embellishment of all or any part of the cemetery or any lot in it, the erection, maintenance, removal, repair or preservation of any memorial, the planting and cultivation of flowers, trees, shrubs or plants in and around the cemetery, or any part thereof, and the filling and care of vases, special care of flower beds, and the placing of floral decorations at dates requested, including the special care or ornamenting of any lot, section, or building, or any portion thereof, or any other purpose or use not consistent with the purpose for which the cemetery was established or is being maintained.

Special care funds may be invested with and in the same manner as endowment care funds.

## **TRANSFER OR ASSIGNMENTS**

### **INDEBTEDNESS**

The management may refuse to consent to a transfer or an assignment so long as there is any indebtedness due the management from the original lot owner or from anyone else in connection with an interment, purchase of the lot, or for any other reason.

## **INTERMENT RIGHTS CONVEYED BY DEEDS**

Interment Rights will be conveyed to the purchaser(s) by a Cemetery Deed. No deed for any interment right shall be issued nor shall any right of ownership pass to the purchaser(s), until the purchase price is paid in full.

## **RECORDING OF LOTS AND BURIALS**

Complete records of all lot owners and interments will be kept at the cemetery office. Because the cemetery is a municipal cemetery and city records are public, information about property owners and interments shall be provided to those who inquire. Record requests may be subject to an administrative fee, which may be charged from time to time by management.

## **TRANSFER AND ASSIGNMENTS**

For the protection of lot owners of the cemetery, and to prevent unauthorized transfers and interments, the management shall have complete records of the ownership of all lots in the cemetery. Therefore, the following restrictions are necessary and mandatory concerning sales, transfers, and assignment of all lots: No person shall sell, transfer or assign any lot or any interest therein without complying with this Rule, and all sales, assignments and transfers contrary to the terms of this Rule are void and of no effect, and will not be recognized by the management. Any person desiring to sell, transfer or assign any lot, or any interest therein, shall convey, transfer and assign such lot or their interest unto the cemetery, and the management will, after checking its records or making such other investigation as it may deem necessary, issue to the person(s) to whom the lot owner desires to sell, transfer or convey such lot, or any interest therein, a Cemetery Deed. Any sale, transfer, or assignment of interment rights must follow any restrictions within the cemetery. Block 31 is a twelve-grave-minimum block; block 33A is a two-grave-minimum block. The management shall make a reasonable charge for its services, which charge must be paid in advance.

Interment rights shall be purchased solely for the purpose of personal or family interment or the interment of the person designated in the purchase agreement, and not for purposes of speculation. The price received for the sale of any lots, graves, crypts, or niches cannot exceed the current selling price of like property by the cemetery.

## **MODIFICATIONS AND AMENDMENTS**

### **AMENDMENTS**

The management may, and it hereby expressly reserves the right, at any time or times, to adopt new Rules and Regulations, or to amend, alter or repeal any rule, regulation, article, section, paragraph or sentence in these Rules and Regulations.

### **EXCEPTIONS AND MODIFICATIONS**

No waiver of any violation of these Rules and Regulations shall operate as a waiver of any subsequent violation of the same rule or regulation or as a waiver of any other rule or regulation, or the violation thereof.

Special cases may arise in which the literal enforcement of a rule may impose unnecessary hardship. The management therefore, reserves the right, without notice, to make exceptions, suspensions, or modifications in any of these Rules and Regulations when, in its judgment, the same appear advisable; and such temporary exception, suspension or modification shall in no way be construed as affecting the general application of such rules.
